SUBJECT INDEX

ABS (acrylonitrile-butadiene-styrene), p. 289
Ammonium polyphosphate, pp. 141, 261
Atrium smoke control, p. 434
Bush fire, p. 472
California fire standards, pp. 337, 417
Calorimetry, p. 482
Car park, p. 357
Carbonization, p. 378
Cardiac sensitization, p. 171
Charring, pp. 261, 289
Cigarette design, p. 386
Cigarette ignition, pp. 337, 417
Cigarette ignition test, p. 127
Cigarettes, pp. 337, 386, 445
Closed chamber, p. 89
CO estimation, p. 214
CO/CO_2 ratio, p. 214
Combustion, pp. 43, 141
Combustion waves, p. 472
Comparative cigarette ignition test, p. 386
Computational fluid dynamics, p. 300
Computer simulation, p. 407
Cone calorimeter, pp. 3, 141
Copolymer, p. 141
Cotton fabric, p. 127
Cotton, smoldering ignition, p. 127
Crosslinking, p. 261
Decabromodiphenyl oxide, p. 141
Degradation, p. 3
Detector responses, p. 89
DINA, pp. 399, 407
Equivalence ratio, p. 214
Equivalent period, p. 235
EVA copolymer, p. 261
Exothermic decomposition, p. 141
Experimental validation, p. 300
Explosive, p. 407
Fire extinguishants, p. 171
Fire model, pp. 89, 214, 235, 300, 434
Fire retardancy, pp. 3, 43, 141
Fire Safe Cigarette Act of 1990, p. 127
Fire safety, p. 482
Flame front, p. 472
Flame propagation rates, p. 281
Flame retardancy, pp. 261, 289
Flame suppressants toxicity, p. 171
Flaming combustion propagation rates, p. 162
Flammability, p. 289
Forest materials–Australian, p. 162
Fourier transform infrared (FT-IR) spectroscopy, p. 197
Full-scale room fires, p. 23
Furniture survey, p. 337
Gas layer, p. 257
Graphite-like structure, p. 261
Halohydrocarbons, p. 171
Halon-1301, p. 171
Halon replacements, p. 171
Halons, p. 171
Heat release rate, pp. 141, 482
Hot particle ingress, p. 350
Ignition of forest litter, p. 350
Ignition of soft furnishings, p. 386
Ignition propensity, pp. 59, 127, 386, 445
Inert gas narcosis, p. 171
Inorganic phosphorus, p. 261
Intumescence, p. 3
Kinetics, p. 3
Limiting oxygen index (LOI), p. 289
Liquid explosive, p. 399
Melamine, p. 104
Mock-up test, pp. 59, 386, 445
NIST cotton duck mockup method, p. 386
Nylon 6, p. 43
Oxygen index (OI), pp. 197, 224
Perfluorocarbons, p. 171
Performance-based codes, p. 177
Physical mechanism of flame suppression, p. 171

SUBJECT INDEX

ABS (acrylonitrile-butadiene-styrene), p. 289
Ammonium polyphosphate, pp. 141, 261
Atrium smoke control, p. 434
Bush fire, p. 472
California fire standards, pp. 337, 417
Calorimetry, p. 482
Car park, p. 357
Carbonization, p. 378
Cardiac sensitization, p. 171
Charring, pp. 261, 289
Cigarette design, p. 386
Cigarette ignition, pp. 337, 417
Cigarette ignition test, p. 127
Cigarettes, pp. 337, 386, 445
Closed chamber, p. 89
CO estimation, p. 214
CO/CO_2 ratio, p. 214
Combustion, pp. 43, 141
Combustion waves, p. 472
Comparative cigarette ignition test, p. 386
Computational fluid dynamics, p. 300
Computer simulation, p. 407
Cone calorimeter, pp. 3, 141
Copolymer, p. 141
Cotton fabric, p. 127
Cotton, smoldering ignition, p. 127
Crosslinking, p. 261
Decabromodiphenyl oxide, p. 141
Degradation, p. 3
Detector responses, p. 89
DINA, pp. 399, 407
Equivalence ratio, p. 214
Equivalent period, p. 235
EVA copolymer, p. 261
Exothermic decomposition, p. 141
Experimental validation, p. 300
Explosive, p. 407
Fire extinguishants, p. 171
Fire model, pp. 89, 214, 235, 300, 434
Fire retardancy, pp. 3, 43, 141
Fire Safe Cigarette Act of 1990, p. 127
Fire safety, p. 482
Flame front, p. 472
Flame propagation rates, p. 281
Flame retardancy, pp. 261, 289
Flame suppressants toxicity, p. 171
Flaming combustion propagation rates, p. 162
Flammability, p. 289
Forest materials–Australian, p. 162
Fourier transform infrared (FT-IR) spectroscopy, p. 197
Full-scale room fires, p. 23
Furniture survey, p. 337
Gas layer, p. 257
Graphite-like structure, p. 261
Halohydrocarbons, p. 171
Halon-1301, p. 171
Halon replacements, p. 171
Halons, p. 171
Heat release rate, pp. 141, 482
Hot particle ingress, p. 350
Ignition of forest litter, p. 350
Ignition of soft furnishings, p. 386
Ignition propensity, pp. 59, 127, 386, 445
Inert gas narcosis, p. 171
Inorganic phosphorus, p. 261
Intumescence, p. 3
Kinetics, p. 3
Limiting oxygen index (LOI), p. 289
Liquid explosive, p. 399
Melamine, p. 104
Mock-up test, pp. 59, 386, 445
NIST cotton duck mockup method, p. 386
Nylon 6, p. 43
Oxygen index (OI), pp. 197, 224
Perfluorocarbons, p. 171
Performance-based codes, p. 177
Physical mechanism of flame suppression, p. 171

Polyacrylonitrile, p. 141
Polycarbonate, p. 224
Polyethylenes, p. 261
Polymer blend, p. 289
Polypropylene (PP), p. 289
Polyvinyl chloride (PVC), p. 289
Radiation error, p. 257
Rate of spread, p. 472
Red phosphorus, p. 261
Restaurant fire, p. 235
Risk analysis, p. 235
Risk assessment, p. 177
Semenov model, p. 399
Smoke/char relationships, p. 289
Smoke control design, p. 357
Smoke density, p. 289
Smoke filling time, p. 357
Smoke suppressant, p. 289
Solid materials, p. 482
Spontaneous heating, p. 378
Talc, p. 43
Temperature measurement, p. 257
Thermal decomposition, p. 43
Thermal degradation, p. 261
Thermal explosion, p. 399
Thermochemistry, p. 104
Thermocouple, p. 257
Thermogravimetric behavior, p. 104
Time constant, pp. 357, 434
Total flooding systems, p. 171
Toxicity, p. 104
Toxicity of gases, p. 23
t-Squared fire, p. 434
Upholstered furniture, pp. 337, 417
Upholstery fabrics, pp. 59, 337, 386, 445
Validation by experiments, p. 89
XPS (ESCA), p. 261
Zinc borate/polycarbonate, p. 224
Zinc/polycarbonate, p. 224
Zone model, pp. 89, 235, 300, 357, 434

AUTHOR INDEX

Benrashid, R., p. 224
Bosseboeuf, G., p. 482
Bourbigot, S., p. 3
Brannigan, V., p. 177
Camino, G., p. 43
Carangelo, M. D., p. 197
Carty, P., p. 289
Chew, L. W., p. 224
Choudhary, V., p. 104
Chow, W. K., pp. 89, 235, 300, 357, 434
Costa, L., p. 43
Cruickshank, A., p. 472
Damant, G. H., pp. 337, 417
